This template supports the structured preparation of NIS2 security incident notifications under § 32 BSIG. It contains three sections for the three-stage reporting chain. The fields are structurally aligned with the BSI portal fields.

## Section A — Early Warning (24 Hours)

Deadline: 24 hours from awareness under § 32(1) No. 1 BStG. Recipient: BSI via portal.bsi.bund.de. No complete analysis required — early information is what matters.

Entity registration number (from BSI registration):

Time of awareness (date, time):

Brief description of the incident:

Initial assessment (malicious / unintentional):

Cross-border impact (yes / no / unclear):

Contact person (name, role, email, phone):

## Section B — Notification (72 Hours)

Deadline: 72 hours from awareness under § 32(1) No. 2 BStG. Update and deepening of the early warning with a first structured assessment.

**Incident assessment (category, severity, type of attack):**

**Known indicators of compromise (IoCs: IPs, hashes, domains):**

**Impact assessment (affected systems, services, data categories):**

**Measures taken (isolation, patches, password resets):**

**Update to early warning (corrections, new findings):**

**Cross-border impact (confirmed / ruled out / unclear):**

## Section C — Final Report (30 Days)

Deadline: 30 days from awareness under § 32(1) No. 3 BSIG. Complete technical and organisational post-incident review.

**Detailed description of the incident and its timeline:**

**Root cause analysis (technical and organisational factors):**

**Applied remediation measures (damage limitation):**

**Security measures taken to prevent recurrence:**

**Impact on third parties or other EU member states:**

**Lessons learned and planned structural improvements:**

This template is structurally aligned with the BSI portal fields. It does not replace the portal form at [portal.bsi.bund.de](https://portal.bsi.bund.de).
